xxxxxxx 351-2488

22nd June 1981,

Dear Mr Salmon,

Thank you for the invitation to give a talk to your Mathematics Society on 'The Quantum View of the World'. I would be happy to do this for you. Either Tuesday 22nd September or Tuesday 29th September would be quite convenient for me.

Perhaps you could let me know if most of the audience would have already been introduced to some elementary ideas about the quantum theory or should I start completely from scratch? Also would an overhead projector be available for transparences I have to illustrate the talk?

Yours sincerely,

Dr M.L.G. Redhead.
